PROJECTS

translateR

- Built a front-end React.js application that shows posts from Chinese language subreddits and displays pinyin of characters when highlighting them
- Used: HTML, CSS, Javascript, Node.js, React.js

Maxwell's Demon Project

- Used Spring to create a UI that depicts a simple physics model of Maxwell's Demon, with bouncing particles and temperature tracked on both sides of a removable barrier
- Used: Java, Spring

EXPERIENCE

Parachute Insurance

June 2021 – Present

Technology and Data Intern

Remote

- Tested various geocoding API's on accuracy to determine the best one for the company
- Created backend API with Flask, which validates address location, proves quotes, and uploads customer data to PostgreSQL database

Hoyalitics

August 2020– Present

Data Consultant

Remote

- Performed analysis on Georgetown Bubble's Facebook data from the past 2 years and created visualizations with Tableau and Tableau Prep
- Prepared and gave powerpoint presentation with consultant team on marketing strategy

EDUCATION
